

# TOPCALF QUATTRO CALF HUTCH

This Topcalf Quattro calf hutch is designed for 4 calves. Despite its size, this calf hutch is very easy to move, using a loader. The Quattro calf hutch offers a high level of comfort for the calves. Moreover, it also offers comfort and ease of work to the farmer.

In order to guarantee quality and a long lifespan of our calf boxes and calf hutches, the frames are made of galvanized steel. The Topcalf Quattro calf hutch is very easy to clean due to the removable slatted floors and the solid plastic walls. The Quattro calf hutch is also equipped with removable separation walls, which allows the farmer to create a small group housing, so the calves can get used to living in a group in an earlier stage. The Quattro calf hutch is also standardly equipped with divisible front gates, lighting and electricity, an isolated roof and sliding panels at the back of the hutch to control the climate inside the calf hutch.

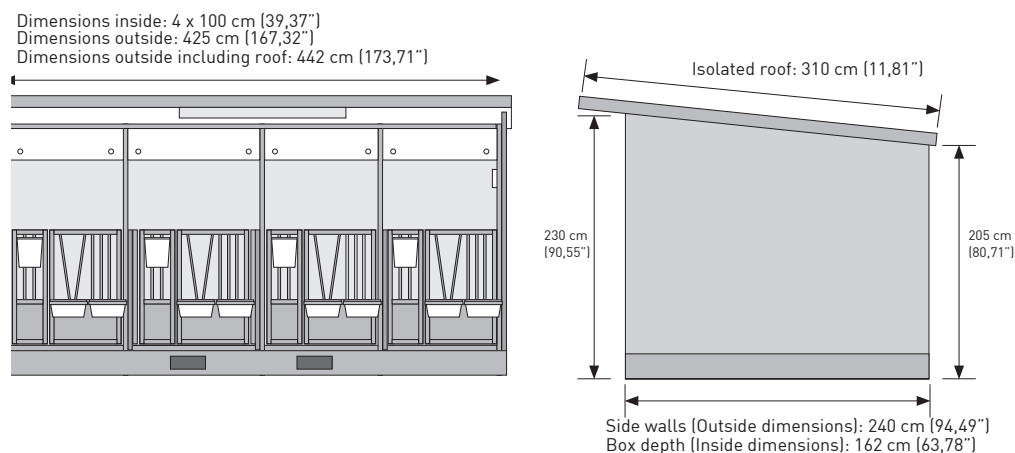

## PRODUCT DESCRIPTION

- ✓ Frame made of galvanized steel
- ✓ Solid plastic walls
- ✓ Adjustable bars in front gates
- ✓ Removable slatted plastic floors
- ✓ Divisible front gates
